Education:

January 2022- Current

CSU Monterey Bay

BS: Computer Science

Upon completion of a computer science degree with a focus on web programming, database management, networks, and algorithms, graduates will possess the skills and knowledge to design and develop complex web applications, effectively manage and optimize databases, administer and secure network infrastructures, and implement efficient algorithms for problem-solving in diverse computational domains. They will be well-prepared to pursue careers as software engineers, web developers, database administrators, network administrators, or algorithm designers in various industries, contributing to the advancement of technology and innovation.

August 2016 - June 2020

UC Santa Barbara

BA: Film and Media

Upon completion of a film and media degree, graduates will be equipped to excel in various aspects of the film and media industry. They will be prepared to work as filmmakers, screenwriters, film critics, researchers, and media professionals, armed with the expertise to create, analyze, and contribute to the rich tapestry of cinematic storytelling and production. Additionally, they will possess a solid understanding of editing software, enabling them to efficiently craft compelling narratives through the post-production process.

Certifications:

CompTIA A+
